CCS Crane and Equipment Cameras

Shown on the crane dash with the CCS4 camera monitor to left and Rayco/Wylie i4507 LMI to right

The CCS camera system will give your operator the tools they need to work safely and efficiently. It's the most cost effective device you can add.

You have a backup camera on your car or truck.

Why not on all your equipment!

Easy magnetic mounts shown in two configurations. To the left is a camera in a birds eye view pointing down. To the right is a horizontal view pointing out. The options allow for a configuration to cover any situation and all blind spots. The mounting is so flexible you can change it in seconds.
