

# Hytera TC-610 two way radio

*You cant find a more powerful, rugged radio!*

The TC-610 is ideal for construction, industrial and other applications looking for an affordable yet reliable radio in a compact & durable design. Its IP66 rated water protection make it extremely useful for jobs that may encounter wet environments during the work day or may need to wash the radio after use in a dirty environment.

## Features:

- ) 2 year warranty
- ) LED battery gauge
- ) Designed to Military standards
- ) 16 Channels in VHF or UHF
- ) Lithium ion battery with 14 hour life
- ) Water and dust rating for wet dirty conditions
- ) Maximum power of any brand radio. 5 Watts
- ) Encoded transmission for secure communications
- ) Can be programmed to work with other brands

## Optional Accessories

### SM08M3 Remote speaker mic

The remote speaker mic allows the user to wear the radio on a belt clip and the speaker can be positioned on a shirt or jacket so calls coming in can easily be heard. Calls out can be sent with one button.

### HNK100 Headset with PTT

The noise canceling headset is designed for loud environments and can be worn under hardhats. The headset includes a inline push to talk (PTT) button. This makes it convenient to talk with the touch of a button.

### BL1204 Battery

1200mAh Li-Ion 7.4V battery for TC-610 radio.

### MCA02 (6) radio multi-charger

The multi-charger can rapidly recharge the batteries in up to 6 radios. This is a convenient option for customers wanting to keep their radios in a central location for easy storage and recharging each day.

The TC-610 kit includes: UHF 450-512MHz Intrinsically Safe radio with battery, charger, antenna, belt clip and programming.
